Control and Manage ... Effortlessly. Comprised of a wide variety of powerful tools, ProximVision® Advanced unifies management of the entire Proxim infrastructure, within a few clicks.

ProximVision Advanced for easy Network Controller

In collaborations that combine our expertise with that of industry, academia and other government laboratories, our scientists and engineers deliver research tools and solutions that enable access to affordable, environmentally clean energy, and reduce our dependence on foreign energy sources.

Energy Research and Development | Argonne National Laboratory

A building management system (BMS), otherwise known as a building automation system (BAS), is a computer-based control system installed in buildings that controls and monitors the building's mechanical and electrical equipment such as ventilation, lighting, power systems, fire systems, and security systems. A BMS consists of software and hardware; the software program, usually configured in a ...
