FORMULAS FOR PERIMETER, AREA, SURFACE, VOLUME Edited by Joanna Gutt-Lehr, PIN Learning Lab, 2007 <http://math.about.com/library/blmeasurement.htm>

FORMULAS FOR PERIMETER, AREA, SURFACE, VOLUME

Further terminology. The perimeter of the base of a cone is called the "directrix", and each of the line segments between the directrix and apex is a "generatrix" or "generating line" of the lateral surface.

Cone - Wikipedia

Have you memorized some of the area and volume formulas, like $A = 4\pi r^2$, without understanding the explanation for the formulas? This is an attempt to explain all the basic area and volume formulas as simply and intuitively as possible, starting with the easy ones and building up to the more difficult formulas for the area and volume of a sphere.

Area and Volume Formulas - Wlonk

In three dimensions, the volume inside a sphere (that is the volume of a ball) is $\frac{4}{3}\pi r^3$ where r is the radius of the sphere. Archimedes first derived this formula, by showing that the volume inside a sphere is twice the difference in the volumes between the inside of a sphere and the inside of a circumscribed cylinder (having the height and diameter equal to the diameter of the sphere).

Sphere - Wikipedia

2. The surface area of a sphere is $4\pi r^2$. Quantachrome's patented NOVAtouch series offers a full line of high-quality, high-performance gas sorption analyzers, with two multi station models to meet the needs of any research or quality assurance laboratory.
