Car Parking - MECHCI CAD Car Parking Elevator Manufacturer

The parking system designed in such a way that it is applicable for covered parks, open parks and street side parking. The fig.1 shows the cloud based IOT architecture for

Automatic Smart Parking System using Internet of Things (IOT)

Automatic number-plate recognition (ANPR; see also other names below) is a technology that uses optical character recognition on images to read vehicle registration plates to create vehicle location data. It can use existing closed-circuit television, road-rule enforcement cameras, or cameras specifically designed for the task. ANPR is used by police forces around the world for law enforcement ...

The parallel parking problem is a motion planning problem in control theory and mechanics to determine the path a car must take in order to parallel park into a parking space. The front wheels of a car are permitted to turn, but the rear wheels must stay aligned. When a car is initially adjacent to a parking space, to move into the space it would need to move in a direction perpendicular to ...

for your convenience. With a quick reference guide Owner's

While no one likes a backseat driver, it can be a real lifesaver to have an extra set of eyes on the road. Driver-assist systems use cameras and sensors to watch out for hazards like a car in your blind spot or suddenly stopped ahead. That's even better than having an actual human onboard, since these systems never get tired, can see better in bad weather and low light, and you can usually ...
