At the dawn of the 21st century, much of our drinking water infrastructure is nearing the end of its useful life. Click to learn more from ASCE.

Water Infrastructure | ASCE's 2017 Infrastructure Report Card

A water filter removes impurities by lowering contamination of water using a fine physical barrier, a chemical process, or a biological process. Filters cleanse water to different extents for purposes such as providing agricultural irrigation, accessible drinking water, public and private aquariums, and the safe use of ponds and swimming pools

The history of water supply and sanitation is one of a logistical challenge to provide clean water and sanitation systems since the dawn of civilization. Where water resources, infrastructure or sanitation systems were insufficient, diseases spread and people fell sick or died prematurely. Major human settlements could

initially develop only where fresh surface water was plentiful, such as near ...
