The concept of biodiversity and the history of conservation biology: from wilderness preservation to biodiversity conservation . JosÃ© Luiz de Andrade Franco

The concept of biodiversity and the history of

The Fabaceae or Leguminosae, commonly known as the legume, pea, or bean family, are a large and economically important family of flowering plants. It includes trees, shrubs, and perennial or annual herbaceous plants, which are easily recognized by their fruit and their compound, stipulated leaves. Many legumes have characteristic flowers and fruits. The family is widely distributed, and is the ...

Fabaceae - Wikipedia

Convergent evolution is the independent evolution of similar features in species of different lineages. Convergent evolution creates analogous structures that have similar form or function but were not present in the last common ancestor of those groups. The cladistic term for the same phenomenon is homoplasy. The recurrent evolution of flight is a classic example, as flying insects, birds ...
