Physics (from Ancient Greek: $\varphi\upsilon\sigma\iota\kappa\acute{\alpha}$ (ἀφύσις, translit. physiká, — (epistá, —má“), lit. 'knowledge of nature', from $\varphi\upsilon\sigma\iota\varsigma$, phŷsis "nature") is the natural science that studies matter and its motion and behavior through space and time and that studies the related entities of energy and force. Physics is one of the most fundamental scientific disciplines, and its main goal is ...

MHT-CET 2014 Question Paper - 11 | Meiosis | Hydroxide

For only the third time in the history of the Nobel Prize in Physics, a female scientist/engineer is among those honored for work in the field.

NSTA Journal Article

The speed of light in vacuum, commonly denoted c , is a universal physical constant important in many areas of physics. Its exact value is 299,792,458 metres per second (approximately 300,000 km/s (186,000 mi/s)). It is exact because by international agreement a metre is defined to be the length of the path travelled by light in vacuum during a time interval of $1/299792458$ second.

Speed of light - Wikipedia

The IPCC is currently in its Sixth Assessment cycle. During this cycle, the Panel will produce three Special Reports, a Methodology Report on national greenhouse gas inventories and the Sixth Assessment Report (AR6).

IPCC - Intergovernmental Panel on Climate Change

Chlorofluorocarbons (CFCs) are to blame for global warming since the 1970s and not carbon dioxide, according to new research from the University of Waterloo published in the International Journal ...

Global warming caused by chlorofluorocarbons, not carbon

This journal is concerned with all aspects of applied physics research, from biophysics, magnetism, plasmas and semiconductors to the structure and properties of matter.

Journal of Physics D: Applied Physics - IOPscience

Boltzmann's constant (k) is a universal constant that defines what we mean by one degree of temperature. It is the conversion factor that converts from degrees to conventional units of energy per particle. It is intimately related to the universal gas constant (R) which converts from degrees to conventional units of energy per mole.

One hundred years ago was born Alan Turing. He was known essentially for his role during the Second World War: he encrypted the Enigma machine. But He is also a brilliant mathematician and today I would try to describe one of his better model, that today biologists are applying to their research field.

Doc Madhattan: Turing patterns in coats and sounds

There are at least four possible positions on the thermodynamics of weight gain: 1. Weight gain does not depend on calories in versus calories out, even in the loosest sense. 2. Weight gain is entirely a function of calories in versus calories out, but calories may move in unexpected ways not linked ...
