Nios II is a 32-bit embedded-processor architecture designed specifically for the Altera family of FPGAs. Nios II incorporates many enhancements over the original Nios architecture, making it more suitable for a wider range of embedded computing applications, from DSP to system-control.. Nios II is comparable to MicroBlaze, a competing softcore CPU for the Xilinx family of FPGA.

Nios II - Wikipedia

The workforce is changing as businesses become global and technology erodes geographical and physical barriers. IT organizations are critical to enabling this transition and can utilize next-generation tools and strategies to provide world-class support regardless of location, platform or device

InformationWeek, serving the information needs of the

The pace of change in our industry has resulted in many people lacking the right knowledge and capabilities to help support the new reality of digital-led, customer-centric marketing.
