Digital & Analog Communication Systems (8th Edition): Leon

In electronics, an analog-to-digital converter (ADC, A/D, or A-to-D) is a system that converts an analog signal, such as a sound picked up by a microphone or light entering a digital camera, into a digital signal. An ADC may also provide an isolated measurement such as an electronic device that converts an input analog voltage or current to a digital number representing the magnitude of the ...

Analog Devices'™ digital isolators enable designers to implement robust solutions with our magnetically isolated i Coupler products with the flexibility of up to 6 channels. Products meet stringent safety standards including the ability to isolate IS-IS with our intrinsically safe certified digital isolators which enable designs in hazardous areas.

Digital Isolator | Analog Devices

Analog Devices'™ world leading direct digital synthesis ICs incorporate features such as on-board comparators, RAM, PLLs, mixers, and registers. This makes them an ideal agile frequency synthesizer solution in systems for communications, test equipment, and radar.

Digital Television is an advanced broadcasting technology that has transformed the television viewing experience. DTV enables broadcasters to offer television with better picture and sound quality, and multiple channels of programming.

Digital Television | Federal Communications Commission

Digital television (DTV) is the transmission of television signals, including the sound channel, using digital encoding, in contrast to the earlier television technology, analog television, in which the video and audio are carried by analog signals. It is an innovative advance that represents the first significant evolution in television technology since color television in the 1950s.

Digital Communication Tutorials. Data Communication Networks and Distributed Systems - Includes both wireless and wired systems.. Introduction to Communications Theory - Very well done, but doesn't really address "communications theory" in the traditional sense of the phrase (i.e. information and detection theory).
