The Scientist and Engineer's Guide to Digital Signal

In signal processing, sampling is the reduction of a continuous-time signal to a discrete-time signal. A common example is the conversion of a sound wave (a continuous signal) to a sequence of samples (a discrete-time signal).. A sample is a value or set of values at a point in time and/or space.. A sampler is a subsystem or operation that extracts samples from a continuous signal.

Sampling (signal processing) - Wikipedia

This is an educational blog aimed at helping the reader understand the theory behind digital signal processing blocks used in digital communication transmitter and receiver. The theory is explained using classical text books as reference accompanied with simulation model using Matlab and/or Octave scripts.

Tutorials on Digital Communications Engineering | Complex

Overview of differences. It is a subject of debate whether analog audio is superior to digital audio or vice versa. The question is highly dependent on the quality of the systems (analog or digital) under review, and other factors which are not necessarily related to sound quality.

Comparison of analog and digital recording - Wikipedia

Digital Signal Processing is distinguished from other areas in computer science by the unique type of data it uses: signals. In most cases, these signals originate as sensory data from the real world: seismic vibrations, visual images, sound waves, etc. DSP is the mathematics, the algorithms, and ...

H Alpha Filter Question for Nikon DSLRs - posted in DSLR & Digital Camera Astro Imaging & Processing: Pretty much every filter that is sold on Amazon, for example, the product descriptions only mention CCDs. Are there separate filters H alpha and SII that are for DSLRs? Or the CCD ones can also be used with a DSLR 1.25 nosepiece adapter?

H Alpha Filter Question for Nikon DSLRs - DSLR & Digital

technique, called backprojection or simple backprojection. Figure 25-16 shows that simple backprojection is a common sense approach, but very unsophisticated. An individual sample is backprojected by setting all the image pixels along the ray pointing to the sample to the same value.

Remember this sequence from the Matrix ? "There is no spoon". Well recently I'm hearing people talk more and more about "resolution" in digital audio, and I'm here to tell you "There is no resolution. It's a red herring" an idea-virus left over from the earliest days of digital audio, perpetuated [!]

There are no "stair steps" in digital audio ! What The

Signal Conditioning uses, environment, sensors and modules, loops and analog signals, plus conditioner signal integrity, and design examples.

HDTV (High Definition TV) - BEGINNER's GUIDE / SOLUTIONS High Definition television (HDTV) is finally becoming available, and is capable of providing a much more detailed video picture than we in the U.S. have been getting. The older, over-the-air TV signal that you and your parents watched is now referred to as NTSC or Standard Definition, (SD) TV.

This document discusses the principles of measuring performance parameters in Synchronous Digital Hierarchy (SDH) networks. This document provides a description of basic alarms associated with SDH networks, and also signal processes involved in an Add/Drop Multiplexer (ADM). Some of the most significant ADM alarms that are generated at various points in the SDH network are illustrated.

Troubleshooting Guide for Synchronous Digital Hierarchy

The security preference set to Use expired timestamps means that an expired signature / expired validity is treated as valid. However, a signature date after the end of the validity of document doesn't make sense, which is the case here.
