SD-23-7541 Bendix ADB22X , ADB22X-V Air Disc Brakes

If the disc brake rotor becomes worn down to a thickness of 1.5 mm or so that the aluminum surface becomes visible, be sure to replace the disc brake rotor with a new one. Check that the brake components have cooled down sufficiently before attempting to adjust the brakes.

Hydraulic Disc Brake - Shimano

If the disc brake rotor is cracked or deformed, immediately stop using the brakes and consult a dealer or an agency. If the disc brake rotor becomes worn down to a thickness of 1.5 mm or less, or if the aluminum surface appears, immediately stop using the brakes and consult a dealer or an agency.

Hydraulic Disc Brake - Shimano

With Bendix® air disc brakes, the same size brake can be used on all axles. Traditional brake designs require different components on the steer, drive, and trailer axles, increasing the number of different parts required to service the brake.

Bendix Air Disc Brakes - Bendix Spicer Foundation Brake

Abstract An automotive brake disc or rotor is a device for slowing or stopping the motion of a wheel while it runs at a certain speed. The widely used brake rotor material is cast iron which consumes much fuel due to its high specific

PARTS CATALOGUE 2014 - WABCO

The disc brake is a lot like the brakes on a bicycle. Bicycle brakes have a caliper, which squeezes the brake pads against the wheel. In a disc brake, the brake pads squeeze the rotor instead of the wheel, and the force is transmitted hydraulically instead of through a cable. Friction between the pads and the disc slows the disc down.. A moving car has a certain amount of kinetic energy, and ...

Disc Brake Basics - How Disc Brakes Work | HowStuffWorks

Carlisle Brake & Friction, through brands such as VelveTouch and FieldPro, is the leading provider of parts and technical support to both the vehicle manufacturer service channels and global independent markets.

AFTERMARKET CATALOG - Superior Friction Solutions - VelveTouch

The brake disc (or rotor) is the rotating part of a wheel's disc brake assembly, against which the brake pads are applied. The material is typically gray iron, a form of cast iron. The design of the discs varies somewhat.
