Electricity and Magnetism: Physical Science Interactive

Magnetism is a class of physical phenomena that are mediated by magnetic fields. Electric currents and the magnetic moments of elementary particles give rise to a magnetic field, which acts on other currents and magnetic moments. The most familiar effects occur in ferromagnetic materials, which are strongly attracted by magnetic fields and can be magnetized to become permanent magnets ...

The word electromagnetism is a compound form of two Greek terms, ἤλεκτρον "lektron, "amber", and λίθος ἠγνῆστος magnētis lithos, which means "Magnesian stone", a type of iron ore. Electromagnetic phenomena are defined in terms of the electromagnetic force, sometimes called the Lorentz force, which includes both electricity and magnetism as different manifestations of ...
