SDL Trados

If you translate using Trados Studio, it's very useful to know how to use MultiTerm to manage your terminology. It can help you translate faster and make the terminology in your translations more consistent. In recent posts I've explained how to create a termbase in MultiTerm and how to import terms from an Excel glossary. (You might want to look at)

How to add a termbase in Trados Studio and use term

If you use Trados Studio, it's a good idea to learn how to use MultiTerm to manage your terminology. For example, you might want to use terms from a bilingual Excel glossary when you're translating in Trados Studio. The PDF below shows how to use MultiTerm to do this. (You might also want to look at)

How to import a bilingual Excel glossary into MultiTerm
