Giuseppe Tomasi di Lampedusa (Italian pronunciation: [dʒuˈzɛppe toˈmaːzi di lampeˈduːza]; December 23, 1896 – July 26, 1957) was an Italian writer and the last Prince of Lampedusa. He is most famous for his only novel, *Il Gattopardo* (first published posthumously in 1958), which is set in his native Sicily during the Risorgimento. A taciturn and solitary man, he spent a great deal of his ...

Pyramid, or pyramid representation, is a type of multi-scale signal representation developed by the computer vision, image processing and signal processing communities, in which a signal or an image is subject to repeated smoothing and subsampling. Pyramid representation is a predecessor to scale-space representation and multiresolution analysis

**ABSTRACT. OBJECTIVE:** Assess the reliability and validity of the Exercise Benefits/Barriers Scale (EBBS) in the elderly. **METHODS:** The reliability was assessed by internal consistency (Cronbach's alpha) and by the test-retest Kendall's W. To verify the construct validity it was used a correlation between the EBBS results and the personal and clinic variables.

### **Reliability and validity of the Exercise Benefits/Barriers**

1. Introduction. Nowadays, the distance that food travels from producer to consumer has increased as a result of globalization in food trade. Therefore, keeping safety and quality along the food supply chain has become a significant challenge.

Swarm-based algorithms emerged as a powerful family of optimization techniques, inspired by the collective behavior of social animals. In particle swarm optimization (PSO) the set of candidate solutions to the optimization problem is defined as a swarm of particles which may flow through the parameter space defining trajectories which are driven by their own and neighbors' best performances.
