Emotion Recognition With Python, OpenCV and a Face Dataset

In this tutorial, you'll uncover my complete guide to building an image search engine (CBIR system) using Python and OpenCV from start to finish.

Building image search an engine using Python and OpenCV

Last update: 10th May 2013. Fixed a mistake in handling reflection case. Finding the optimal/best rotation and translation between two sets of corresponding 3D point data, so that they are aligned/registered, is a common problem I come across. An illustration of the problem is shown below for the simplest case of 3 corresponding points (the minimum required points to solve).

Finding optimal rotation and translation between
